

AA66

Foam Gasket Kit for Use With GWN Series Devices

Product Overview

The AA66 foam gasket kit is used with the GWN series gas platform housing. In some applications, the GWN is installed on a non-standard electrical box (e.g. weatherproof-style electrical box). In these applications, the GWN housing may not provide a proper seal against the box. To improve the fit, install the AA66 foam gasket between the housing and the box. The AA66 includes replacement screws to secure the GWN and gasket to the box.

NOTICE

- This product is not intended for life or safety applications.
- Do not install this product in hazardous or classified locations.
- Read and understand the instructions before installing this product.
- Turn off all power supplying equipment before working on it.
- The installer is responsible for conformance to all applicable codes.

No responsibility is assumed by Veris Industries for any consequences arising out of the use of this material.

Installation

1. Disconnect power prior to installation.
2. Prior to mounting the GWN to the electrical box, place the foam gasket as shown below. Use the screws included with the AA66 to secure the GWN in place.
3. Follow the instructions for wiring and configuring the GWN according to the GWN installation guide.
