VERIS BOASTS ANOTHER INDUSTRY FIRST – THE ADDITION OF HUMIDITY AND TEMPERATURE SENSOR OPTIONS TO ITS ALREADY SUCCESSFUL DUCT CO2 SENSOR (CDL)

PORTLAND, Ore – April 24, 2007 – Veris is proud to announce the release of optional humidity and temperature features to its award winning CDL Carbon Dioxide Sensor line of products. With three sensors in one compact unit customers receive significantly reduced installation time and costs.

Mike Borst, Veris' Environmental Sensors Product Manager, stated "We have received excellent market response from our wall CO2 package with humidity and temperature, and many of those customers are now requesting the same feature set be offered in our duct configured devices. In true Veris form, we have listened and responded."

The CDL line is already a widely recognized leader in its product category, utilizing a unique transducer and duct probe configuration housed in a single NEMA-IV enclosure. With the new humidity and temperature options, the CDL further expands its application uses and functional capability.

About Veris Industries

Veris Industries is a premier provider of energy and environmental sensor products, and is recognized for setting new standards in customer service and product innovation. For additional information on the CDL Series, or any of Veris' industry leading products please call 1.800.354.8556 or send an email to sales@veris.com
