VERIS INDUSTRIES BROADENS POWER METER PORTFOLIO WITH THE NEW H8400V DIGITAL POWER METER SERIES

PORTLAND, Ore – February 21, 2005 -Veris Industries, a leader in building automation technology, is giving customers expanded metering options with the introduction of its smartest and most fully-featured Digital Power Meter Series.

The H8400V Series will be released to the market in early March 2005. The digital power meters are ideal for energy management and performance contracting, submetering, activity based costing, and real-time power monitoring via local display or through control/data acquisition systems. With options ranging from a 1-phase display-only meter to a 3-phase communicating meter, and the choice of panel, wall, or DIN rail mount, the H8400V series offers a meter to fit any application.

The H8400V Series includes a large, easy-to-read display, intuitive navigation with context-sensitive menus, and option of panel, wall, or DIN rail mount. All meters meet ANSI C12.16 and boast a 1% energy and power accuracy. Additionally, the H8400V Series offers a 600V monitoring solution.

The display-only units are available in two data display output versions: kW/kWh only, or up to 26 data points. The pulse output unit offers two pulse outputs with three data options to choose from: kWh, kVARh, or phase detection. The Modbus communication units are available in 3 data sets: kW/kWh only, up to 26 data points, or up to 50 data points.

Delivering high accuracy, ease of use and flexibility at a competitive price the H8400V Series is the ideal power meter for any metering application.

About Veris Industries

Veris Industries is a premier provider of energy and environmental products for the worldwide building automation industry, and is recognized for setting new standards in customer service and product innovation. For additional information on the new H8400V Series, or any of Veris' industry leading products please call them at 1.800.354.8556 or send an email to sales@veris.com
